Contents Volume 164

1 Loop based facility planning and material handling
A. Asef-Vaziri and G. Laporte
12 A co-operative parallel heuristic for mixed zero–one linear programming: Combining simulated annealing with branch and bound
V. Nwana, K. Darby-Dowman and G. Mitra
24 Local adjustments: A general algorithm
L. Péridy and D. Rivreau
39 Machine scheduling with deliveries to multiple customer locations
C.-L. Li, G. Vairaktarakis and C.-Y. Lee
52 Insertion of a random task in a schedule: a real-time approach
C. Duron, J.-M. Proth and Y. Wardi
64 Crane scheduling in container yards with inter-crane interference
W.C. Ng
79 Reducing quadratic programming problem to regression problem: Stepwise algorithm
D.Q. Wang, S. Chukova and C.D. Lai
89 The biobjective undirected two-commodity minimum cost flow problem
A. Sedeño-Noda, C. González-Martín and J. Gutiérrez
104 Quadratic cost flow and the conjugate gradient method
J. Sun, X. Yang and X. Chen
115 Criteria for generalized invex monotonicities
X.M. Yang, X.Q. Yang and K.L. Teo
120 Supply chain networks, electronic commerce, and supply side and demand side risk
A. Nagurney, J. Cruz, J. Dong and D. Zhang
143 Competitive advantage through take-back of used products
H.S. Heese, K. Cattani, G. Ferrer, W. Gilland and A.V. Roth
158 Who should control inventory in a supply chain?
C.C. Lee and W.H.J. Chu
173 Modeling the role of retail price formats, and retailer competition types on production schedule strategy
S. Ghose, J.J. Liu, A. Bhatnagar and H. Kurata
185 Reexamination of processing time uncertainty
Q. Cao, J.W. Patterson and X. Bai
195 The influence of demand variability on the performance of a make-to-stock queue
Z. Jemaï and F. Karaesmen
206 A least deviation method to obtain a priority vector of a fuzzy preference relation
Z. Xu and Q. Da
217 Valuing the business environment on a daily basis
J.L. Nicolau

doi:10.1016/S0377-2217(04)00742-8

225 Core, least core and nucleolus for multiple scenario cooperative games
M.A. Hinojosa, A.M. Mármol and L.C. Thomas
239 Solving the combinatorial double auction problem
M. Xia, J. Stallaert and A.B. Whinston
252 Customer base analysis: partial defection of behaviourally loyal clients in a non-contractual FMCG retail setting
W. Buckinx and D. Van den Poel
269 Efficient market-clearing prices in markets with nonconvexities
R.P. O'Neill, P.M. Sotkiewicz, B.F. Hobbs, M.H. Rothkopf and W.R. Stewart Jr.

287 An overview of the design and analysis of simulation experiments for sensitivity analysis
J.P.C. Kleijnen
301 Base station location and channel allocation in a cellular network with emergency coverage requirements
M.R. Akella, R. Batta, E.M. Delmelle, P.A. Rogerson, A. Blatt and G. Wilson
324 An integrated systems approach to process control and maintenance
K. Linderman, K.E. McKone-Sweet and J.C. Anderson
341 Performance of static priority rules for shared facilities in a remanufacturing shop with disassembly and reassembly
V.D.R. Guide Jr., G.C. Souza and E. van der Laan
354 Definition and properties of the input-weighted average lead-time
H. Jodlbauer
358 Inventory models with variable lead time and present value
G. Yang, R.J. Ronald and P. Chu
367 On interval estimation of the coefficient of variation for the three-parameter Weibull, lognormal and gamma distribution: A simulation-based approach
W.-K. Pang, P.-K. Leung, W.-K. Huang and W. Liu
378 Reliability function of a class of time-dependent systems with standby redundancy
A. Azaron, H. Katagiri, M. Sakawa and M. Modarres
387 A preemptive priority queue with balking
S. Drekic and D.G. Woolford
402 Reverse multiple recursive random number generators
H.-C. Tang
406 Second order symmetric duality in non-differentiable multiobjective programming with *F*-convexity
X.M. Yang, X.Q. Yang, K.L. Teo and S.H. Hou
417 An -sensitivity analysis for semidefinite programming
S. Lim, S. Lee and S. Park
423 Forest structure optimization using evolutionary programming and landscape ecology metrics
H.D. Venema, P.H. Calamai and P. Fieguth
440 Layout design for flexible manufacturing systems considering single-loop directional flow patterns
T. Yang, B.A. Peters and M. Tu
456 Two new algorithms for UMTS access network topology design
A. Jüttner, A. Orbán and Z. Fiala
475 Modelling and optimisation for sustainable development policy assessment
M. Cannon, B. Kouvaritakis and G. Huang
491 A practical model of Heineken's bottle filling line with dependent failures
R.M. Cooke, A. Bosma and F. Härte

505 A Steiner arborescence model for the feeder reconfiguration in electric distribution networks
P. Avella, D. Villacci and A. Sforza
510 Preference scheduling for nurses using column generation
J.F. Bard and H.W. Purnomo
535 Estimating output gains by means of Luenberger efficiency measures
H. Fukuyama and W.L. Weber
548 A decision-rule for transplanting non-cadaveric organs
A. Levy
555 Hedge fund performance appraisal using data envelopment analysis
G.N. Gregoriou, K. Sedzro and J. Zhu

573 Editorial: Recent advances in scheduling in computer and manufacturing systems
J. Błażewicz, K. Ecker and D. Trystram
575 Path colorings in bipartite graphs
D. de Werra
585 Chromatic scheduling in a cyclic open shop
M. Kubale and A. Nadolski
592 A review of exact solution methods for the non-preemptive multiprocessor flowshop problem
T. Kis and E. Pesch
609 A triple objective function with a Chebychev dynamic pick-and-place point specification approach to optimise the surface mount placement machine
M. Ayob and G. Kendall
627 Scheduling tasks on a flexible manufacturing machine to minimize tool change delays
K.H. Ecker and J.N.D. Gupta
639 Simulated annealing and tabu search for multi-mode resource-constrained project scheduling with positive discounted cash flows and different payment models
M. Mika, G. Waligóra and J. Węglarz
669 A buffer minimization problem for the design of embedded systems
A. Munier Kordon and J.-B. Note
680 A graph based model for survivability applications
A.W. Krings and A. Azadmanesh
690 Complexity of master–slave tasking on heterogeneous trees
P.-F. Dutot
696 Fuzzy c-means clustering and Internet portals: A case study
M. Ozer
715 Modeling uncertain activity duration by fuzzy number and discrete-event simulation
H. Zhang, C.M. Tam and H. Li
730 Multi-issue allocation situations
P. Calleja, P. Borm and R. Hendrickx
748 Solving a multiobjective possibilistic problem through compromise programming
M. Arenas Parra, A. Bilbao Terol, B. Pérez Gladish and M.V. Rodríguez Uría
760 Solving multiattribute design problems with analytic hierarchy process and conjoint analysis: An empirical comparison
A. Scholl, L. Manthey, R. Helm and M. Steiner
778 Characterizations of the 3-cycle count and backward length of a tournament
H. Monsuur
785 Reference point approach for multiple decision makers
R. Lahdelma, K. Miettinen and P. Salminen

792 A measure of risk and a decision-making model based on expected utility and entropy
J. Yang and W. Qiu
800 Data envelopment analysis based decision model for optimal operator allocation in CMS
T. Ertay and D. Ruan
811 Positive dynamic systems with entropy operator: Application to labour market modelling
A.Y. Popkov, Y.S. Popkov and L. van Wissen
829 Innovation diffusion uncertainty, advertising and pricing policies
B. Kamrad, S.S. Lele, A. Siddique and R.J. Thomas
851 Single machine preemptive scheduling with fixed jobs to minimize tardiness related criteria
J. Yuan and Y. Lin
856 *Contents Volume 164*
